1. You have just received a referral for an AAC evaluation of a 3-year-old Cerebral Palsy child who described as “nonvocal”. Please describe your assessment plan. (20 points).

2. Your conclusion from the assessment is that the child is has a “language age” of 1.5 years and she is appropriate for an introduction to Big Mac switches and a 4 item Cheap Talker. Please describe your treatment plan including several goals, descriptions of example activities, and most importantly justifications for your goals and activities in terms of the readings by Cress, Foley, Erickson and the chapter on Literacy. Be sure to describe how you will target these goals in the home environment and as part of her school curriculum demonstrating attention to the best practices of AAC intervention. (30 points).
